> Elysium Luxury Apartment Complex, Gordon, NSW

Set beneath a canopy of towering gum trees and magnificently appointed internal landscaping the Elysium apartments are located in Gordon on the upper North Shore of Sydney.

Elysium comprises four buildings with a total of 149 luxury apartments comprising of 1, 2 & 3 bedroom layouts, with high quality fixtures and finishes that you would expect from a Meriton development.

As with all Meriton developments, innovative design and quality construction materials were used to create these apartments.

K10 Plus - a water-based polyurethane waterproofing membrane, was therefore the obvious choice to waterproof the buildings' bathrooms. K10 Plus is a tough, flexible Class III waterproofing membrane that eliminates the need for a reinforcing layer. Available in green and grey, it is also capable of drying in 6-8 hours.
