> Rancagua's Regional Hospital

The Rancagua's Regional Hospital project involves the construction of approx. 68 000 m². It consists in the construction of multiple volumes, including six floors building plus one underground level and other smaller buildings associated to the main one. The project is located in an 8.5 hectares expansion area through the west part of the city.

The complex includes buildings, connecting streets, parking lots and technical areas, among others.
