> Hero Motor Corp. – Halol plant

When Hero Motor Corp. – World's single largest two-wheeler motorcycle manufacturer based in India, were looking for waterproofing solution for their new plant in Halol - Gujarat, they invited PAREX India to review their site and give the appropriate solution. They wanted waterproofing done on their terrace area across the plant-- the main production facility of motorcycle and scooters.

PAREX alongwith its authorised applicator visited the site, with area of application of 10,000 sq.mt. After, reviewing the site K10 PU Plus was recommended for the terrace waterproofing.

K10 PU Plus in white colour was used as an underlayment. It was covered with screed and finally solar panels installed on top of it.

This project was successfully completed in 2016 and is a prestigious project for our reference.
