> Damaged and crack concrete repair

When the office of Charity of Commissioner, Gujarat were looking for repairing their old office structure, they invited ParexGroup team along with our authorized applicator who specializes in repair works, to review their site.

After visiting the site, we recommended LANKO 731 reinforced thixotropic structural grade repair mortar. The initial crack filling and bonding was done using LANKO 751. Once the column and ceiling's were treated, LANKO 731 was used to repair the surface whilst giving it a seamless finish. Approximate material consumed of LANKO 731 (5MT) and LANKO 751 (50kg).

LANKO 731 met Clients requirement and project was successfully completed including repairs of building Columns, beams etc.
