> LRT Station (Kelana Jaya Link)

The Kelana Jaya Line is a light rapid transit (LRT) system network in Klang Valley operated by Rapid Rail, a subsidiary of Prasarana Malaysia. It used to be known as the PUTRA line.

The line runs from Kelana Jaya to Gombak, serving the Petaling Jaya region to the south; southwest and central Kuala Lumpur, and Kuala Lumpur City Centre to the centre; and low density residential areas further north.

The stations are given in a north-south direction, consists primarily of elevated stops and a handful of underground and at-grade stations. Of the 24 stations, 18 are elevated, 1 lies at ground level, and 5 stops (Masjid Jamek, Dangi Wangi, Kampung Baru, KLCC and Ampang Park) are underground.

The Kelana Jaya Line starting from Kelana Jaya and ends at Putra Heights covers a distance of 17km.

Facilities works involve the construction of the infrastructure components such as the guide way, piers and stations, as well as the casting and delivery of segmental box girders for both lines.
