

> Facade Protection and Decoration

> Hotel GI. Skivehus

Hotel GI. Skivehus has been a well recommended hotel for years and expansions over the years have left different markings on the facade. In 2015/2016 the hotel was totally renovated including the facade.

One part of the hotel was insulated with the exterior Skalflex facade Insulation system:

Insulation, dowels, Skaltherm Grundpuds with mesh, finished with Skalcem S2000 White.

The new and the old building got the same modern look, perfected with new windows, wooden details etc.

— APPLIED PRODUCT —

- Skalcem 2000

— TECHNICAL DETAILS —

- Approx. 250 m²
