### > IPS Hospital Ingavi jobsite

Governmental jobsite investment for a public hospital. It will be the biggest public hospital in the country with capacity for 600 beds, 38 therapy units and 22 operating rooms.

The engineer responsible for the jobsite was decided to use SIKA tile adhesive insisting with the better price that the competitor have compared with our tile adhesive (30% more expensive).

We insist in doing a pull off test with all the tile adhesive in the Paraguayan market.

With a report showing the high quality level of our product compared with all the others, the engineer decided to use our tile adhesive KLAUKOL Porcellanato Fluido.
