

> Tile Setting and Flooring Materials

> Zinnia Towers

Zinnia Towers, a two-tower resort-inspired community, sits in a 1.9 hectare community with almost 70 percent of the land area dedicated to amenities and open spaces. Figure in the balance between nature and structure. Delight in bidding courtyards and lush landscaping that reconcile natural light and breeze.

This project is one of the on-going projects of DMCI Homes, the country's first Quadruple A builder-developer. The Zinnia Towers development in North EDSA, Quezon City is composed of 2 towers, the North Tower with 40 levels and the South Tower with 45 levels.

The project used our DAVCO Standard Tile Adhesives for the installation of all their ceramic tiles (for both floors and walls). The project consumed approximately 15,000 bags of the DAVCO Standard Tile Adhesive.
