

Waterproofing Systems and Technical Solutions

The Regency Hotel Kuala Lumpur

The Regency Hotel Kuala Lumpur is located within the bustling Kuala Lumpur city center with impeccable 311 designed guestrooms, leisure corners, meeting halls and restaurants.

DAVCO K11 Slurry 613, a two-component waterproofing system was sprayed and painted on to the hotel's outdoor swimming pool as part of the hotel's repair project. DAVCO K11 Slurry 613 was used to waterproof and damp-proofed the pool's concrete wall and to protect against concrete carbonation and penetration.

Regency Hotel has since opened on time with a beautiful 'new' swimming pool and classy pool side environment.
